

■ Roaming Billing

Key features

- Direct exchange of TAP and RAP files with roaming partners (inbound and outbound roaming)
- Test profiles with test IMSI for correct processing of roaming data
- Complex dial plan management and testing; calculations of complex discounts based on various parameters (volume, time, periods, users, services or calls, service usage)
- Near Real-Time Roaming Data Exchange (NRTRDE) reduces the timeframe for delivery of fraud-related roaming data and allows operators to manage roaming fraud more effectively
- Flexible and detailed reporting of financial data
- Automated reconciliation from top level to detailed EDR elements, alerts and SLA audits; configuring and creating reconciliation reports
- Open for integration with existing financial systems

Benefits

- Minimized or even eliminated clearing house costs for all settlements and data clearing processes
- Increased revenues as a result of fully automated payment control and invoice matching
- Increased control over revenues and costs with automated roaming reconciliation
- Fraud prevention with near-real-time Roaming Data Exchange
- Roaming data exchange protection with test profiles and test IMSI
- Verified pricing and data correctness with RAP files processing and generation

■ Bill Shock Prevention

- Control over voice, data and SMS services in real-time (local and roaming services)
- Support for setting limits of service usage for end customers
- Automated communication with end customers with regards to continuing or disconnecting the service when a limit is reached (SMS / e-mail)
- Easy integration with existing systems; complex changes to current business processes not required
- Enabled adherence to EU regulation (EC) No 544/2009
- Possibility for end users to control their roaming service bills
- Improved customer experience
