Reference letter

Tesco partner with Comarch SA as the Polish WAN supplier – within Network Managed Services – providing both excellent services and commitment follow-through.

Within the project Comarch designed and implemented a solution which covered:

- Creating a highly reliable structure for over 315 locations,
- Supply of basic – based on MPLS technology – and backup data transmission connections,
- Supply of Internet connection,
- Supply and lease of network devices – based on Cisco Systems solutions,
- Support and network maintenance within high SLA's,
- Continuous monitoring and network management services,
- Continued pro-active optimization of the network structure and its costs,
- Ad-hoc technical consulting services.

The project was realized and maintained in a full outsourcing model. Comarch maintains responsibility for the functionality of the entire polish solution.

During the realization of the project and on-going maintenance of the system, Comarch proved its devotion, professionalism and experiences by delivering a high quality service valid of a trusted partner to Tesco.

Martin Berdych
Infrastructure and Operations Manager
Tesco Central Europe
