

Requirements for the remote participant:

In order to use an IT platform dedicated to participate in remote proceedings using electronic means of communication, each shareholder entitled to remote voting should have:

- Internet connection to the public network with a minimum bandwidth of 1 Mbps (suggested constant bandwidth when using the platform),
- a computer equipped with speakers, working under the control of the Windows 10 operating system with one of the following browsers installed on it: Chrome, Firefox, Internet Explorer, Brave, Safari. in the latest version (all browsers listed are freely available for download on the public Internet network) and the Adobe Flash plugin.

In addition, JavaScript must be running on the computer's operating system.

While using the platform, it is suggested that the user not use other applications that significantly burden the computer and communication link used by the platform.
