**MINISTRY OF FINANCE
NATIONAL INFORMATION SYSTEM FOR
THE MONITORING AND FINANCIAL
CONTROL OF THE EU STRUCTURAL FUNDS**

MINISTRY OF FINANCE

SIMIK is an information system that enables monitoring and financial control in the process of implementation and allocation of the Structural Funds, Cohesion Fund and other European Aid Funds. The overall objective of the project is to strengthen the capacity of Polish State Administration to effectively manage and exploit EU financial assistance.

- management of the European resources for European Union co-financed projects; monitoring of financial ratios and effects of projects implemented as a part of Community Support Framework and Operational Programmes (split into funds, priorities, measures and projects);
- supplying the European Commission with necessary reports regarding the implementation of Structural Funds and Cohesion Fund in Poland; monitoring and management of projects from submitting the proposals through subsequent stages of project management;
- financial control and evaluation of projects support. The ISKOS System has multi-tier architecture and operates in MoF WAN. It is dedicated for 4 700 users working in 41 locations (MoF, 16 Fiscal Control Offices, 24 non-resident offices).

Systems integrated with SIMIK: the European Commission System, the National Bank of Poland System, the Central Statistical Office System, the Financial-Accounting System of the National Fund for Environmental Protection and Water Management, the Financial-Accounting Systems of Managing Authorities and Intermediate Bodies.

Institutions engaged in developing the SIMIK system: Ministry of Finance; Ministry of Economy, Labour & Social Policy; Ministry of Agriculture and Rural Development; Ministry of the Environment; Ministry of Infrastructure; Voivodship and Marshal Offices; the National Fund for Environmental Protection and Water Management, General Directorate of National Highways and Motorways; PKP POLISH STATE RAILWAYS Joint Stock Company; Agency for Restructuring and Modernisation of Agriculture; Polish Agency for Enterprise Development; Central Statistical Office.

ABOUT COMARCH

Comarch is a provider of complete IT solutions for telecoms. Since 1993 the company has helped CSPs on 4 continents optimize costs, increase business efficiency and transform BSS/OSS operations. Comarch solutions combine rich out-of-the-box functionalities with high configurability and are complemented with a wide range of services. The company's flexible approach to projects and a variety of deployment models help telecoms make networks smarter, improve customer experience and quickly launch digital services, such as cloud and M2M. This strategy has earned Comarch the trust and loyalty of its clients, including the world's leading CSPs: Vodafone, T-Mobile, Telefónica, E-Plus, KPN and MTS.
