One-stop shop for financial solutions entrepreneurs need
YOUR GOAL

▪ All-in-one solution type
▪ Open platform with fintech-grade services to choose from
▪ Quick time-to-market...

We have your back

Focus on what really matters to your business.
Make it work in 6 months

Let SMEs manage a wide range of banking products and services without having to purchase additional systems that support cash pooling or credits & loans individually.

Automate your customers’ routine activities associated with running a business thanks to embedded data analytics and extensive self-service features.

Expand your bank product portfolio with pre-integrated invoicing and accounting features to address the unique needs of SMEs.
OUR SOLUTION

One vendor - full suite of services

See how Comarch SME Banking works in 3 simple steps

Step 1: Transaction banking

Let SMEs manage a wide range of banking products and services without having to purchase additional systems that support cash pooling or credits & loans individually. Benefit from a quick 6-month deployment for a new digital cash & liquidity management suite.
CASH MANAGEMENT & REPORTING
- Multi-banking feature to let bank customers aggregate information on accounts held in different banks
- Cash pooling, cards, deposits and cheques – online access to multiple banking products from a single login
- One dashboard to manage all types of transfers
- Effectively managed cash flows with instant access to multi-currency accounts
- Google-like search engine to let your customers quickly find the information they need
- Data exchange automation for extremely fast and convenient processing of a large amount of data
- Comprehensive, up-to-date information without delay thanks to a highly efficient mechanism for data import and export

COMMUNICATION
- Any troublesome task or question addressed with no delay through the chat feature
- Event-based, adjustable notifications that really matter to your customers

CUSTOMER SERVICE
- Dedicated tool for bank employees to help them build and maintain a meaningful relationship with your customers
- Real-time collaboration with bank customers and problem-solving on the spot
- Automated task management to improve the effectiveness of bank employees

SECURITY FRAMEWORK
- Strong authentication methods compliant with PSD2
- Flexible privilege setup for data security
- Transaction security ensured by configurable approval workflows

IDENTITY & ACCESS MANAGEMENT
- Complete tool to keep control over bank employee access rights
SELF-ADMINISTRATION

- One central place to let your customers manage users, companies, privileges, devices and more
- Easy payment limit setup to help SMEs keep track of their finances
- More control over day-to-day business activities for your customers leading to lower operating cost and less workload for your RMs

SELF-ONBOARDING

- Secure digital customer onboarding to save on operating costs and let your customers access banking right away
- Individual configuration of user rights for any person within the organization
- Fast access to user profiles, product mapping, account settings, security schemes and approval workflows

Step 2: SME business acceleration

Embrace new capabilities that go beyond transaction banking. Handle specific SME-driven business needs with out-of-the-box fintech solutions and simply plug them into transaction banking.
INVOICING & ACCOUNTING

- Convenient access to documents – users can easily create, track, manage and reconcile VAT invoices, pro forma invoices, advance invoices, and more
- Configurable templates for document printouts to create customized invoices
- One central place to manage company customers, suppliers and products
- Automated bookkeeping capabilities to considerably trim down the time spent on repetitive financial tasks

ONLINE STORE & WAREHOUSE

- Online warehouse to automatically keep control of stock levels to prevent the sale of unavailable products
- Ready-to-deploy online store templates
- Built-in tool for running online store and managing the entire sales process

CUSTOMER ANALYTICS

- Comprehensive and up-to-date reporting that can be easily set up by dragging and dropping required items
- Data-driven business decisions thanks to easy-to-read reports
- Data-based findings allowing business owners to take full control over their company’s finances and respond quickly to changes
- Automatic, adjustable reports based on customer settings
SME-ORIENTED MOBILE BANKING

- Mass transactions within thumb’s reach - authorized with just a few taps
- All the balances, deposits and loans clearly readable on small screens thanks to optimum system operation on a range of devices
- Instant creation of new invoices on the go
- Counterparty and product management to quickly respond to business needs
- Full control over outstanding invoices thanks to automatic notification

Step 3: Open architecture

When your business needs to grow, quickly extend the platform with new modules and features thanks to a reliable API.

Modern system architecture opening the door to agile delivery

- DevOps tools for continuous delivery and fast production deployment
- Continuous platform improvement based on the roadmap that guarantees access to new developments
- Smooth integration and governance of new modules and applications (both internal and external) with an open API
Comarch SME Banking builds upon its sister system – Comarch Corporate Banking which marked its presence on the market 20 years ago. Since then, it was implemented in the largest banking groups in numerous countries, proving its worth as a handy and flexible banking solution for SMEs and corporations.
