

COMARCH

Comarch tPro ECC

Protect your customers from remote attacks
and save on operating costs

**Need a cost-effective solution
for digital signature?**

**Here it is: Comarch tPro ECC,
an innovative USB token designed
to provide corporate and private
banking customers with the
highest security level.**

Selected capabilities

Strong customer
authentication

Transaction
authorization

Document
signing

Certificate
storage

Reasons to own

1

Enhanced Security

tPro ECC is equipped with an elliptic curve cryptographic (ECC) coprocessor providing instant key generation and secure digital signing. Advanced protection is ensured by the push-button functionality.

2

Reduced Costs

tPro ECC works on PCs with all popular operating systems and web browsers, without the installation of any additional drivers, plugins or software, thus reducing costs related to maintenance and support.

3

Straightforward Integration

tPro ECC can be easily integrated in a browser through a JavaScript library (based on WebSocket API). Electronic signatures can be verified by standard PKI components, free tPro libraries, or Comarch tPro Authentication Server.

4

100% Made in Europe

tPro ECC tokens are designed, developed, and manufactured by Comarch at its own facilities in Krakow, Poland, thus complying with all EU requirements and standards.

Security elements are at the core of our business, and we believe that unique and well-established Comarch tPro solutions will ensure even better customer experience in e-identity management for financial industries. We value the flexibility and attitude that Comarch expresses towards their partners. It allows us to better fulfill our clients' needs by accomplishing quality and speed of implementation along with production flexibility.
