

# REVOLUTIONIZING DATA CENTER & IT SERVICES

We believe in providing businesses with the very best IT solutions - including a reliable and secure infrastructure to store, manage and process their data. Our data center offerings are designed to meet the increasing demand for robust and flexible services, ensuring that organizations can operate efficiently and effectively in an increasingly digital world.

## New location. Same Mission.

Comarch is proud to announce its new data center location in the Phoenix metro area - which is joining our already established and operated data center network worldwide. Our new location is equipped with state-of-the-art technology, providing businesses with a secure, reliable, and scalable infrastructure.

Our global data center solutions empower businesses all around the world, and our new USA location allows organizations to expand their operations and reach a wider audience. **No matter where.**

### Data Center Services

- **Managed services:** allow businesses to focus on their core operations while we manage their IT infrastructure, ensuring it runs smoothly and efficiently.

- **Colocation services:** provide businesses with a secure and 24/7 monitored location to store their IT equipment.

- **Migration assistance:** ensure a smooth transition from legacy systems, on-premise or to a new cloud provider.

- **Private cloud:** provide businesses with a secure and flexible infrastructure, tailored to a business's unique needs.

### Monitoring & Security

Security is our primary concern. We have equipped our data center with the latest technology to ensure the safety and security of our client's data. Whether it's innovative physical safeguards and around-the-clock monitoring, or multi-factor authentication and biometric safeguards, Comarch treats your data like our very own.

# Our new data center in the Phoenix Metro Area

## Location Specifications

### Data center space

- 32,000 total sq. ft
- 16,000 sq. ft of data center space
- 320 rack capacity
- Class A office space including shared office, conference rooms and break rooms

### Power

- Total critical IT load: 2MW
- Power densities available up to 12kW per rack
- Diverse power distribution to the data vault
- 2N redundancy per vault (UPS, PDU, Generator support systems)
- 72-hour fuel storage capacity

### Security

- 24x7x365 Security and Operations team
- 24x7x365 CCTV monitoring
- Fenced campus with centralized, electronic access control system
- 3-factor access controls: fingerprint scan, key card, and PIN
- Mantrap system and tailgating prevention
- Multi-factor authentication throughout facility

### Connectivity

- Carrier-neutral
- Access to two on-site providers
- Two diverse fiber entry points
- Two building-owned and managed Meet-Me-Rooms (MMR)

### Cooling

- DX cooling with Free-Cooling Economization System
- Cooling design with hot aisle containment and N+1 redundancy in the vaults
- ASHRAE design temp - 20 Year Extreme Design Summer Dry

### Certifications\*

- SOC1 (ISAE3402)
- SOC2
- ISO 27001
- Designed to meet UTI Tier III and TIA 942 / Rated-3

### Fire Protection

- Aspiration smoke detection (VESDA)
- Gas-based fire suppression
- Fire resistant walls
- Centrally monitored alarm system

### Additional Amenities

- Gated delivery and loading area
- Crash carts, rack, and server lifts
- Free secure guest WiFi
- On-site parking and storage
